ICC PREFERRED EDUCATION PROVIDER

INTERNATIONAL CODE COUNCIL UPDATE ON BUILDING CODES AND STANDARDS

This presentation is a one-hour overview of recent advances in the US Building Regulatory System as it pertains to codes and standards and their application. We will discuss advances in technology to assist in the application and compliance of codes and standards, highlight some of key changes between the 2021 and 2024 I-Codes, provide a background on the role of Conformity Assessment in the building regulatory schema and identity key resources available to assist with code compliance.

Learning Objectives:

1. Analyze the components of the US Building Regulatory System and compare code changes in the 2024 edition of ICC's Building Codes from previous editions.
2. Summarize key technical advances that are reshaping the code compliance landscape.
3. Access and apply ICC resources to assist with code compliance.
4. Recognize the critical role Conformity Assessment plays in the proper functioning of the building regulatory system.

PRESENTER: Mark A. Johnson, COO, International Code Council (ICC)
