■ THURS., OCT. 8, 2020 - 11AM-NOON ET ENERGY CODE COMPLIANCE WITH CONCRETE MASONRY

(1 AIA/CES LU HSW | 0.1 ICC CEU)

By Nick Lang ~ *VP Business Development, National Concrete Masonry Association*

This program presents an overview of energy code compliance based on 2015 & 2018 IECC and IBC. Details are provided on both prescriptive and trade off compliance alternatives with an emphasis on concrete masonry assemblies and resources using both R-factor and U-factor tables. The uses and advantages of COMcheck for compliance for masonry are reviewed.

■ THURS., NOV. 12, 2020 - 11AM-NOON ET MASONRY DETAILING TIPS (1 AIA/CES LU HSW | 0.1 ICC CEU)

By W. Mark McGinley, PE, Ph.D, FASTM, FTMS ~ *Professor and Endowed Chair for Infrastructure Research, Civil and Environmental Engineering, University of Louisville*

Effective design of masonry often is dependent of proper detailing. This presentation will discuss some of the critical issues related to detailing of exterior masonry wall systems including lintels, bond beams, shelf angles, continuous insulation, and new assembly strength allowances. Design for differential movement of dissimilar materials and the wall system detailing practices will be presented.
